To Whom It May Concern:

I am interested in the Software Engineering internship at CareYaya Health Technologies. I believe that I am well qualified and well prepared for this internship position because of my academic background and personal experience, and I would like to be considered.

I am currently a second-year Computer Science student also pursuing a minor in Mathematics at the University of Central Florida where I have taken courses in data structures and algorithms and object-oriented programming. From these courses, I have learned strong software development principles and advanced problem-solving skills.

In my personal projects, I have built apps using Django, Next.js, React.js as well as using databases such as MongoDB and PostgreSQL. In my most recent project, I make use of Django, React.js, machine learning, and API creation to make a basketball betting app. I have a strong attention to detail and self-drive that has allowed me to go above and beyond in not only my coding projects but also with my team at my current job.

I look forward to hearing back from you. Thank you for your time and consideration. If you have further questions, please contact me at au563482@ucf.edu or (813)-847-7312.

Sincerely,
Austin Villanueva.
